

PROEQUIP SET317

HANDSFREE KIT FOR V-COM M80 INCLUDING RADIO

SET317 is a complete professional communication package designed for reliable and flexible mobile use.

The set includes the V-COM M80 Mobile Radio (66–88 MHz), a robust unit with BNC connector and handsfree preparation, ensuring stable performance and easy integration in demanding environments.

For seamless operation, the package comes with the ProEquip Finger PTT (Push-To-Talk) with a 3.5 mm 400 cm slim IP67 cable, offering secure, water- and dust-protected functionality in the field. To support ergonomic use, the set also contains the ProEquip Mounting Plate for Slim Finger-PTT, allowing the operator to attach and operate the PTT comfortably in various working conditions.

Clear audio is provided by the ProEquip Gooseneck Microphone, designed for precise voice pickup and hands-free communication. To enhance signal strength and sound quality, the ProEquip Microphone Amplifier is also included, ensuring optimal performance even in noisy or challenging environments.

Together, these components make SET317 a versatile solution, ideal for professional users who require dependable mobile radio communication with high audio clarity, durability, and user-friendly operation.

KEY FEATURES

- Robust mobile radio with handsfree preparation
- Ergonomic and flexible PTT operation
- Clear voice transmission with gooseneck microphone
- Optimized audio with microphone amplifier
