

# PROEQUIP 88113

MIC AMPLIFIER REPLACEMENT, 2.5 MM CONNECTORS

New product designed as a replacement for the SpeakUp microphone amplifier (88112) and Procom DM8350.

This unit provides a compact and reliable solution for microphone signal amplification in professional communication environments.

- Equipped with 2.5 mm connectors for direct connection to the V-com M80 and the ProEquip microphone.
- Output level adjustable via an integrated trimpotentiometer (sealed Bourns 3314), ensuring stable performance and precise tuning with a 1 mm flathead screwdriver.
- Designed for durability and consistent operation in demanding applications.
- Rear side fitted with high-quality 3M self-adhesive tape for quick and secure mounting without additional hardware.

The combination of robust components and straightforward installation makes this product an effective drop-in replacement, offering long-term reliability and ease of use.
