

# ProEquip Wireless PTT-unit

WIRELESS PTT-UNIT INCLUDING WIRELESS PTT

A ProEquip PTT Unit to create a wireless PTT function for radio equipment. The box is intended to be built into other products and comes with an open-ended cable for soldering.

## FEATURES & BENEFITS

- Portabel och robust
- Allows you to create the possibility of wireless PTT when the radio lacks Bluetooth®
- Can be used to use a wireless PTT in, for example, hands-free installations in vehicles
- Up to three wireless PTT can be connected at the same time

## OPTIONAL

29467	ProEquip Wireless 2G Small PTT
29466	ProEquip Wireless 2G Big PTT

## SPECIFICATION

VCC 3-10VDC

Frequency 2.4GHz (not Bluetooth®)

Range up to ~10m

Pairing button on the box for easy pairing of several wireless PTT devices (you can have 3 connected at the same time).

Power consumption approx. 20 mA

## PAIRING INSTRUCTIONS

- Make sure the radio is plugged in and turned on.
- Hold the pairing button on the dongle.
- Press and release the PTT on the wireless device once
- The radio should now start transmitting, if it does then release the button on the dongle
- If not, try pressing the wireless PTT again
- Everything should now work
