

# ProEquip PRO-Dual Airtube 35L

BLACK CABLE, ACOUSTIC AIRTUBE, 3.5MM FOR ICOM

ProEquip Dual Acoustic Airtubes designed for L & R ear including Open Ear Insert. 3.5mm L-connector compatible with Icom radios with 3.5mm socket.

This is a version of an earphone where the sound is generated in a transducer and then transmitted to the ear via an air tube.

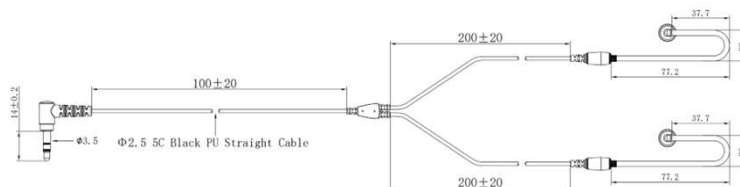

This item is intended for direct connection to the radio. If you wish to have a corresponding item for connection to a RSM (Speaker Microphon) or other adapter, the item without the suffix -N in the item number is recommended.

## FEATURES & BENEFITS

- The Open Ear Insert is significantly more comfortable to wear than a regular rubber tip.
- With Open Ear insert you are able to hear both ambient noise and the radio traffic
- Intended for direct connection to the radio
- 3 pcs (S,M,L) of the Open Ear Inserts for each left and right ear are included, also available as spare parts
- Angled connector makes the connector to sit firmer in the jack to avoid that it accidentally gets pulled out of the jack

## SPECIFICATION
