ProEquip Adapter Cable

SEPURA SC <=> PELTOR NEXUS, HEADSET CONFIG

A ProEquip Adapter Cable for Sepura SC2/STP. When using this adapter cable, the adapter cable uses ID which means it uses the headset profile in Sepura. When programming the radio, it is recommended that the headset microphone gain setting (7230) is set to 36dB instead of the default setting of 21dB. This adapter cable is also duplex compatible.

FEATURES & BENEFITS

- Robust Sepura side contact with metal lug for secure and wear-resistant locking to the radio
- Manufactured under hi quality controlled conditions
- Advantages of factory-made cables include higher load capacity, less risk of moisture penetration into the contact, and better electrical properties.
- ProEquip's accessory program includes a wide selection of suitable headsets and cables in different designs

OPTIONAL (examples)
