

ProEquip PRO-AT35L IFB version

FABRIC CABLE, ACOUSTIC AIRTUBE, HI-DEF

The ProEquip earhanger with acoustic airtube, fabric cable and 3.5mm TRS right angle connector is compatible with IFB and IEM receivers, phones and Icom radios with 3.5mm socket.

This is a version of an earphone where the sound is generated in a transducer and then transmitted to the ear via an air tube. With an upgraded transducer element (Hi-Def) developed from the hearing aid technology

NOTE

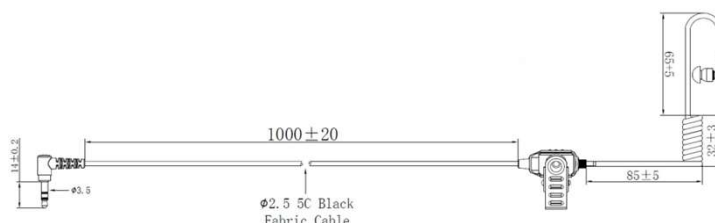

This version is not intended for use with Speaker Microphones

FEATURES & BENEFITS

- The earpiece fits comfortably around the ear and is adjustable for left or right side (twist and adjust the L-formed joint)
- Coiled airtube made of hypoallergenic silicone
- With FabricLine fabric cable that is durable and that doesn't tangle just as easily as its PVC counterpart.
- Comes with three different sizes of eartips, 1-,2- or 3-flange versions, also available as spare parts
- Comes with one set of each ProEquip EarFly Inserts (S,M,L) for left and right ear, also available as spare part
- The loudspeaker part has an integrated clip that typically be clipped to the collar
- Angled connector makes the connector to sit firmer in the jack to avoid that it accidentally gets pulled out of the jack
- Upgraded transducer element (Hi-Def) developed from the hearing aid technology
- Supplied in a plastic storage box
