

ProEquip PRO-AT35L

FABRIC CABLE, ACOUSTIC AIRTUBE, HI-DEF

The ProEquip earhanger with acoustic airtube, fabric cable and 3.5mm angled connector. The earhanger is compatible with Icoms radios with 3.5mm jack and ProEquip RSM such as the PRO-SP490 series and the V-COM-SP480.

This is a version of an earphone where the sound is generated in a transducer and then transmitted to the ear via an air tube. With an upgraded transducer element (Hi-Def) developed from the hearing aid technology.

FEATURES & BENEFITS

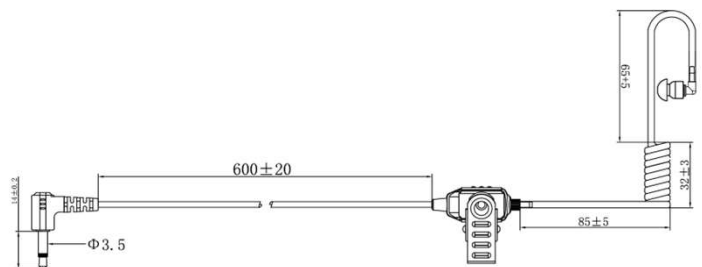

- The earpiece fits comfortably around the ear and is adjustable for left or right side (twist and adjust the L-formed joint)
- Coiled airtube made of hypoallergenic silicone
- With FabricLine fabric cable that is durable and that doesn't tangle just as easily as its PVC counterpart.
- Comes with three different sizes of ear tips, 1-, 2- or 3-layers versions, also available as spare parts
- A range of different ear tips is available for the ProEquip acoustic air tube, in addition to those supplied with it—all to ensure users can choose the solution that suits them best.
- The loudspeaker part has an integrated clip that typically be clipped to the collar
- Angled connector makes the connector to sit firmer in the jack to avoid that it accidentally gets pulled out of the jack
- Upgraded transducer element (Hi-Def) developed from the hearing aid technology

OPTIONAL (examples)

- 60170-60176 ProEquip EarFly inserter, different sizes
- 60178, 60179 ProEquip Open ear inserter, different sizes
